

Report Writer/Developer

Seeking individual to fill full-time, entry-level position of Report Writer.

Job Description:

- Creates new and modifies existing reports as deliverables with standard IQS system.
- Creates new and modifies existing reports as billable service for customers. This includes both in-house and customer site report writing as defined by customer.
- Install and test reports for both Oracle and SQL Server database platforms.
- Work with customers to define report requirements and create documentation.
- Based on requirements provide time to complete estimates, and deliver reports with accuracy and in a timely matter meeting deadlines.
- Will perform basic training needs for "Using Crystal Reports" and "Using Crystal Reports with IQS". This includes both in-house and customer site training as defined by customer.

Job Requirements:

- Must be familiar with relational databases concepts.
- Strong analytical and problem solving skills.
- Excellent communication skills.
- Attention to detail.

Desired experience/knowledge:

- Associate or Bachelor's degree highly desirable. Can substitute experience for education.

This position will eventually lead into other service responsibilities. Specifically, data migration using in house developed application and/or native database tools. Applicant must be willing to learn, flexible, organized, and able to handle multiple concurrent projects while delivering on a deadline and with little supervision.
